### Short Company presentation (R & D guidelines, international activities, etc.)

Agente Cognitivo is a Brazilian technology-based startup that develops a multi-agent AI platform focused on identifying opportunities, technology transfer, territorial development, and new business generation. The company connects universities, science and technology institutions (STIs), governments, businesses, and innovation ecosystems to transform knowledge into projects, solutions, and spin-offs with economic and social impact. It is currently in the technology validation phase and is building strategic national and international partnerships to expand its innovation capabilities.

### DESCRIPTION OF ITS TECHNOLOGY AND CAPABILITIES IN R & D (Products, technologies, applications, services, etc.)

Agente Cognitivo develops a platform based on multi-agent artificial intelligence capable of identifying complex challenges, mapping competencies, connecting experts, and structuring innovative solutions. The technology combines data analysis, territorial intelligence, business modeling, open innovation, and support for the creation of startups and spin-offs. Its applications span the bioeconomy, creative economy, govtech, regional development, sustainability, and digital transformation. R&D activities focus on developing intelligent agents, recommendation systems, technology transfer mechanisms, and models for coordinating scientific research, the market, and public policy.

## PROPOSED COLLABORATIVE PROJECT IN R & D

(As much detail as possible, both in what it offers and what you want in a potential partner)

**Agente Cognitivo seeks** to develop, in collaboration with international partners, a multi-agent Artificial Intelligence platform aimed at identifying technological opportunities, facilitating knowledge transfer and open innovation, and generating new science- and technology-based businesses.

**The proposed technology** combines intelligent agents, territorial intelligence, data analytics, competency mapping, solution modeling, and connection mechanisms linking universities, research centers, companies, governments, and innovation ecosystems.

The goal is to lower barriers between research, technological development, and the market, thereby accelerating the creation of startups, spin-offs, and solutions for complex challenges. We are seeking partners with expertise in Artificial Intelligence, multi-agent systems, data science, digital transformation, technology transfer, open innovation, and digital platform development.

There is particular interest in projects applied to the bioeconomy, sustainability, the creative economy, govtech, Industry 4.0, and regional development. Agente Cognitivo offers expertise in innovation ecosystems, institutional coordination, territorial development, business model validation, and access to networks of universities, research institutions (ICTs), companies, and civil society organizations in Brazil. This collaborative project aims to develop, validate, and internationalize the platform, creating new opportunities for technological cooperation, applied research, and innovation between Brazil and international partners.
