Short Company presentation (R & D guidelines, international activities, etc.)

Chescoved do Brasil is a Brazilian company specialized in supplying products, engineering services, and technical solutions for industrial maintenance. The company serves the pulp & paper, oil & gas, energy, mining, chemical, naval, and general industrial sectors. Its portfolio combines the commercialization of high-performance industrial technologies with specialized technical services, supporting customers in equipment reliability, corrosion protection, surface preparation, sealing systems, and maintenance optimization. Chescoved works with internationally recognized technology partners and is interested in establishing long-term collaborations for technology introduction, industrial validation, and innovation projects in Brazil.

DESCRIPTION OF ITS TECHNOLOGY AND CAPABILITIES IN R & D (Products, technologies, applications, services, etc.)

Chescoved provides technical solutions for industrial maintenance through the supply of products and specialized engineering services. Main areas of expertise include:

- Advanced surface preparation technologies; Industrial coatings and corrosion protection solutions;
- Bearings, mechanical seals, valves, and industrial sealing products;
- Surface preparation equipment and consumables;
- Technical consulting and engineering support;
- Equipment inspection and maintenance planning;
- Field technical assistance and technology implementation; Pilot testing and industrial validation of new technologies.

The company is interested in collaborative R&D projects involving industrial maintenance, advanced materials, corrosion protection, surface engineering, asset integrity, and sustainable industrial technologies.

Chescoved can contribute as an industrial partner by supporting field validation, customer engagement, technical implementation, and commercialization of innovative solutions in the Brazilian market.

PROPOSED COLLABORATIVE PROJECT IN R & D

(As much detail as possible, both in what it offers and what you want in a potential partner)

Chescoved do Brasil is seeking international partners to jointly develop, adapt, validate, and commercialize innovative technologies for industrial maintenance, asset integrity, corrosion protection, and reliability.

The company offers:

- Strong commercial presence in the Brazilian industrial market;
- Access to end users in the pulp & paper, oil & gas, energy, mining, chemical, and naval sectors;
- Engineering support and field technical assistance;
- Industrial pilot projects and field validation under real operating conditions;
- Technical training, technology implementation, and market development in Brazil.

Chescoved is looking for partners with innovative products, materials, equipment, inspection technologies, digital solutions, or maintenance methodologies that require industrial validation and market introduction in Brazil and Latin America.

Potential collaboration areas include:

- Advanced materials and protective coatings;
- Corrosion and wear mitigation technologies;
- Surface preparation and industrial cleaning;
- Predictive and condition-based maintenance; Inspection and monitoring technologies;
- Rotating equipment reliability;
- Industrial digitalization and asset management;
- Sustainable maintenance solutions that reduce environmental impact and operational costs.

The objective is to establish long-term R&D and innovation partnerships focused on adapting technologies to local industrial requirements, conducting pilot demonstrations, validating technical and economic performance, and accelerating market adoption through bilateral international cooperation.
