R&D in Galileo: a success story in FP6 (i/iii)

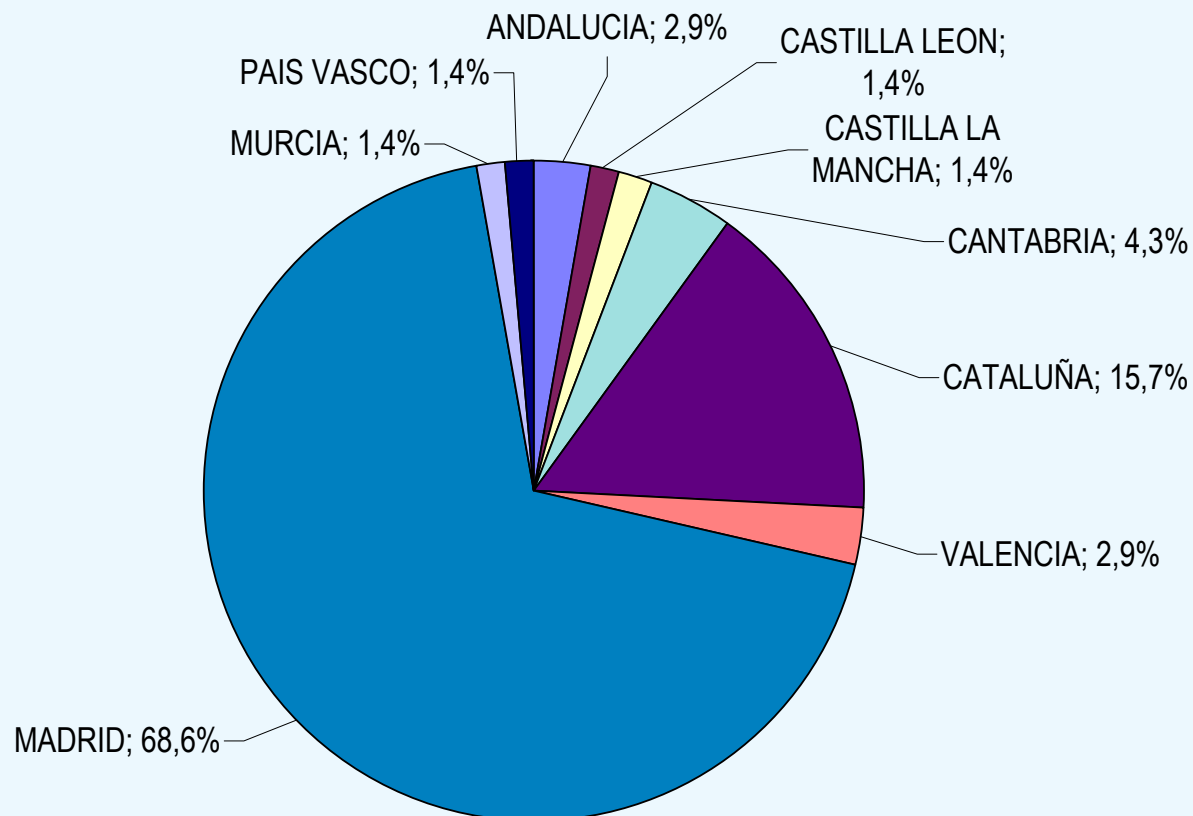

R&D in Galileo: a success story in FP6 (ii/iii)

- Close to 12 M€ community contribution
- Spain present in 30 activities with 38 partners
- Average 2.3 Spanish participants per action (9 in total)
- Leading 6 activities: INECO, Atos Origin, GMV, UPC and INDRA Space
- Mostly enterprises (90%), followed by universities (4%), RTD centres (3%) and public administrations (3%)

R&D in Galileo: a success story in FP6 (iii/iii)

WHY STILL GALILEO / GNSS

- Tremendous potential, both for the Spanish participants and the society in general
- Key importance for a large country in the periphery of the EU
- Because the future talks “Galileo”:
 - Where are my keys? Where did I park? Where is my boss? Where did my grandmother go?
 - “Call me on my GPD” (Galileo Positioning Device)
 - Being lost is not a nice feeling

THANK YOU FOR YOUR ATTENTION!
and, ENJOY THE DAY!
