

A dynamic background image featuring a large, energetic splash of water in shades of blue and white, creating a sense of movement and freshness. The water droplets and ripples are clearly visible, adding texture to the scene.

2nd China-Spain Innovation Partnership Development Forum, Environmental Sector

- Zhao Junping, come from industrial water treatment research department of Hebei sun-water water treatment co., LTD(SEM),China.
- Company is committed to research chemical industry and water treatment.
- Our institution's URL is www.sangwote.cn, and our emile zjp39698@126.com.

Objectives of our company

- Since the establishment of company, we have been committed to the research of new technology of water-saving in industry, the development of environmentally friendly efficient water quality stabilizer, the service and consulting of wastewater reuse technology development, saving water and drainage decrease technology, etc.

- Company provides professional technology and products, and provide guidance and help for the problems and difficulties which arise in the industrial enterprise production process. We believe that through our continuous efforts and pursuit, we will achieve mutual benefit and win-win with customers.

Skills

- Company is mainly engaged in water treatment, the development and sales of chemical technology product, the consulting services of water treatment engineering technical, the wholesale and retail of water treatment equipment, chemical equipment and energy saving products and so on.

- Company is existing scale corrosion inhibitor, germicidal agent, indicator of rapid detection on water hardness, and other industrial water treatment series of products.

Projects in the area

- Cooperation project:
- Currently we are carrying out a research into the following items:
- (1) Green environmental protection water treatment technology research and development.
- (2) Environmentally friendly as well as the development and application of high efficient water treatment medicament.

- Cooperation needs:
- We are hope each other can be used in industrial water treatment system of environmental protection of water-saving new technology and new type of green water treatment chemicals research and development of technology and application results. Purpose is to improve industrial water reuse rate is low, the water consumption and sewage water status quo, for the enterprise energy conservation and emissions reduction, and effective utilization and saving of water resources.

Thanks!
